

STANSEfabrikken
Automotive

Automotive in Lithuania

Stamping Department

- progressive coil stamping
- up to 1300 ton capacity
- up to 4500x1800 tool size

Up to 1300 ton capacity and up to 4500x1800 tool size provides the ability of producing highly complex parts with a lot of feature steps as well as large format parts.

High strength materials such as DOMEX 500 are suitable for our production.

In line quality control gives endless feedback.

Robot Welding Department

- fast and reliable work cycles
- superior accuracy
- excellent work quality

Brand new sophisticated welding robots with superior levels of control and path following accuracy provides excellent work quality.

The adjustable process speed and position helps us to achieve optimum manufacturing accuracy with little or no rejects.

Tooling Department

- reliable tool suppliers
- experienced team
- fast reacting

Highly experienced tool suppliers provides us with sophisticated tools and great service also support us with know-how knowledge.

Tooling department located in plant gives the ability of both daily maintenance of tools and fast restoring after any breakage.

Quality Department

- wide variety of metrology operations
- high accuracy scanning
- outstanding performance

Quality is our #1 priority. We take pride in delivering a great product to our customers and delivering it on time. Working according to ISO 9001, ISO 14001, TS 16949 from the start.

All of our departments share the same common goal - to achieve 100% Customer Satisfaction.

UAB Stansefabrikken Automotive is new company in STAFA group, established 2006/2007. The company is established in STAFA's own Industrial Park in Ukmerge, Lithuania, and will operate their business in newly renovated facilities.

The purpose of this establishment is to build a competitive component and a Tier 2 supplier within the automotive business, where stamping is the base process.

This establishment is a supplement to the Norwegian company - Stansefabrikken Lillesand, which has been a Tier 2 supplier for many years, and today deliver to well known customers in both Sweden, Germany and Poland.

The main strategy is to produce the most advanced products in the most efficient way. In order to do this, the company will act according to the LEAN principles.

Our sister company, UAB Stansefabrikken located at the same site, has a high quality powder coating department, also available for this unit. Logistics from Lithuania to central Europe is highly competitive, both in time and cost.
